15 POINTERS FOR SPRING CLEANING

List the jobs, room by room, that have to be done. Cross them off as they are completed.

Schedule the work for several days or a week to avoid exhausting yourself. Start with the closets and finish with the floors and curtains. It is best to do one room or similar-type jobs at a time. Always complete one task before starting another.

Arrange to rent an electric floor scrubber-polisher with a rug-shampooing attachment if you know how to use it but do not have one. You might even want to buy this timesaving appliance.

Reorganize closets, drawers and cabinets before officially starting spring cleaning. Sort things into three boxes labeled "need", "Storage", and "out". Get rid of useless or unnecessary items.

Label contents of boxed items you plan to store or number them. Keep a master list of contents for each.

Repaint badly scuffed woodwork and other items rather than trying - usually in vain - to scrub them clean.

Give your vacuum cleaner a good workout. Use it for everything from dusting books and emptied drawers to blowing out dust from under radiators. Vacuuming loose dust and soot from walls, Venetian blinds, lampshades, closet and other shelves simplified washing and rinsing them.

Test a small, inconspicuous section of a wall, painted or wallpapered, and let dry first if you are not sure about its washability. This also applied to upholstery and lampshades.

Clean nonwashable walls with the round brush attachment of the vacuum cleaner or with a broom well wrapped in a soft, clean cloth. The well-known wallpaper "doughs" do a fine job on unwashable painted or papered walls.

Work from the floor to the ceiling in washing walls to avoid streaks which may be hard to remove.

Wash a small section of a wall at a time. Overlap the cleaned areas. If necessary, rinse and wipe dry.

Finish washing a wall once you have started. This avoids leaving a cleaning line that may be difficult to blend in later.

Use a long-handled squeegee for washing windows outside and rinse with a hose. Inside windows, unless coated with a greasy film, may only need a dusting with a dry paper towel. Newest alternature to the spray-on products are the treated paper towels. Some are used dry, others with a bit of water.

Polish glass, after cleaning, with a lintless cloth, paper towel or crumpled newspaper.

Brighten aluminum (on windows, doors, etc.) with a soap-filled steli-wool pad. Use stainless-steel cleaner on stainless steel.

RECIPE OF THE WEEK

Egg Souffle Salad

Dissolve 1 package lemon gelatin in 1 cup hot water. Add ½ cup cold water, 2 tablespoons vinegar, ½ cup mayonnaise, salt and pepper. Blend well with rotary beater. Pour into refrigerator freezing tray.

Quick chill for 15-20 minutes, or until firm 1 inch from edge, but soft in center. Turn mixture into bowl, whip with rotary beater until fluffy.

Fold in 3 diced hard-cooked eggs, ½ cup diced celery, and 1 tablespoon each diced green pepper, diced pimiento, and finely chopped onion. Arrange 1 sliced hard-cooked egg in salad mold, pour gelatin-vegetable-egg mixture on top.

Chill until firm in refrigerator 30 to 60 minutes. Unmold, garnish with greens and additional mayonnaise if desired. Serves 4-6.

USDA ANNOUNCES 1975 OPERATIONAL GUIDELINES

The U. S. Department of Agriculture (USDA) recently announced operational procedures and initial State funding for the 1975 Agricultural Conservation Program (ACP). General details of ACP and the funding level were announced March 17.

Authority to develop practices needed to solve conservation problems is being delegated to each of USDA's farmer-elected county Agricultural Stabilization and Conservation (ASC) Committee in consultation with the county program development group. All approved practices in effect under the 1970 National Agricultural Conservation Program are eligible. Practices developed by county ASC committees will be subject to approval by State ASC Committees in consultation with the State program development group.

Throughout the practice development and cost-sharing approval process, ASC State and county committees should emphasize the objective of assuring that cost-sharing will be for carrying out enduring soil and water conservation measures that the farmer would not perform without this assistance.

Specialized assistance for ACP will be provided by other USDA agencies with the Soil Conservation Service furnishing planning and technical assistance on conservation practices.

GEORGE TAYLOR OF EVERGREEN has good reason for the "big" grin on his face after catching the 9 pound large-mouth bass he is holding. He caught this big fish at Lake Gaston located below Buggs Island with bait he made himself.
